

# Features & Benefits

## Full Integration

Electronic transfer of all works orders to and from your clients. Reduces manual entries, errors and unnecessary data duplication and saves time and money.

## Organised Plans

Fully audited works orders. No more lost works orders on bits of paper or sheets that could be easily misplaced. Save time looking for jobs. Now the data is centralised.

## Overview

Identify shortfall in planned resources at a glance. Large number of projects (works orders) can be planned and viewed instantaneously, giving the user a better understanding of the resources available.

## Drag and Drop

Simple easy to use planning tool with Drag and Drop features. Has the ability to move other works orders automatically when planning emergency works. Helps reduce the time to plan effectively increasing productivity.

## Customisation:

Modular designed software to ensure flexibility in providing custom driven solutions.

## Early warning system

Operators are assisted at every stage of planning, indicating a failure to plan correctly, when to serve notice and handles all time line issues, reducing the possibility of noticing and overstay charges. Ensures the user plans correctly, preventing contractual disputes or liquid damages.

## Complies with legislation

The system conforms to the Traffic Management Act, by using "Appendix E" and "EToN 4" file format. Issuing electronic notices to clients and ensuring full coordination of works.

## Automated Noticing:

By using the One Click mobile solution, a real time automated process provides recorded evidence of the actual start and end of all works via photographic evidence.

## Reduces Litigation:

The photographic evidence can prevent or reduce litigation worries.

## Showing Parity:

A system that is separated from your clients and works independently, show others the true parity of the solution.

Profit from our solutions

F & B

F & B

## UTILITIES & CONTRACTORS:
